PROBLEM STATEMENT/TITLE:

Café Menu design

ABSTRACT

The café menu website is a meticulously designed and interactive online platform created using HTML, CSS, and JavaScript. With a focus on providing a delightful user experience, the website aims to showcase an extensive range of delectable food options available at the café. By employing intuitive navigation and visually appealing layouts, the website enables customers to explore the menu offerings effortlessly.

Through the utilization of HTML, the website ensures a structured and semantic representation of content, allowing for easy maintenance and accessibility. CSS is utilized to enhance the aesthetics and styling of the website, employing appealing color schemes, typography, and responsive design principles for optimal viewing across devices.

The inclusion of JavaScript enriches the user experience by enabling dynamic elements, such as real-time ordering features.

TOOLS USED

HTML CSS Javascript
